The graph displays the number of cases over time for two groups: 'No vaccination' (black line) and 'Vaccination' (blue line). The x-axis represents months from August to December. The y-axis represents the number of cases, with a scale break between 100 and 1000. Vertical red dashed lines indicate dates when the vaccination status was updated. The 'No vaccination' group shows a steady increase in cases, while the 'Vaccination' group shows a sharp drop in cases after the vaccination update in October.
